ASME Y14.43 is a foundational document for the creation of fixed gages that follow the principles of GD&T. In addition to providing four levels of gaging, it gives explanations for each level. The distribution of tolerance between the workpiece and gage is clear and precise.

Y14.43 - American Society of Mechanical Engineers

Examples of gages used to inspect workpieces using regardless of feature size (RFS) are shown in Appendix C. These practices focus on the design of receiver-type gages, which collect attribute data when used for the verification of workpieces dimensioned and toleranced in accordance with ASME Y14.5M-1994. For gaging and fixturing principles and ...

These practices represent examples of product definitions allowed by ASME Y14.5. Since ASME Y14.5 is not a gaging standard, ASME Y14.43 shows the practical embodiment of the theory displayed in ASME Y14.5 by illustrating how the workpieces can be fixtured and gaged for tolerance verification.
