However, when it comes to charting and documentation, I just try to be as objective as possible. For instance: "Patient complains of severe nausea and is currently eating chips in triage." That uses the patient's own words but paints a pretty clear (and objective) picture of what is really going on.

Background. Little is known of the language healthcare professionals use to describe cough sounds. We aimed to examine how they describe cough sounds and to assess whether these descriptions suggested they appreciate the basic sound qualities (as assessed by acoustic analysis) and the underlying diagnosis of the patient coughing.
